

Reeves®

EMS

READY FOR ANYTHING

From rehabilitation and incident command shelters to flexible stretchers and decon equipment, Reeves EMS brand products are built to handle the next fire-rescue situation. Reeves quick erect shelter systems are military tested to withstand blowing rain and high wind gusts. Additionally, shelters come with a full array of optional accessories including mobile power systems, air conditioning, heating and lighting, ensuring that you can set up anywhere in any weather.

Reeves signature stretchers, spine boards and body covers are built for emergency responders. Constructed from durable materials, Reeves patient movement equipment is lightweight, but strong enough to hold approximately 1,000 pounds, providing the right support whatever the situation. Reeves also offers durable decon shelters and accessories, including the latest in cutting edge NBC decontamination equipment and products, to ensure that you are ready for anything.
