First introduced in 2005, Deployable Rapid Assembly Shelter (DRASH) Deployable Command and Control Equipment (DC2E) was developed to solve the information management problems facing today's incident commander. Comprised of projector systems and multiple sized audio visual switching systems, the DC2E provides lightweight, portable communications technology by fusing multiple feeds of information onto single or multiple displays. Special features include touch panel control, high resolution image display, diskless drive and 24/7 operating capabilities.

DC2E MEDIUM SCREEN DISPLAY, SXGA+
BP300A019 / NSN's Pending

Designed for 24/7 operation, the DC2E Medium Screen Display, SXGA+ is built for today’s incident commander. The system features a DLP projector that accepts and displays images with a resolution of up to 1920 x 1200. Despite its numerous capabilities, the Medium Screen Display system is compactly stored in two separate wheeled cases for easy transport.

Multiple screen systems can also connect together to form a dual screen (1008844) or triple screen (1008843) system.

Features:
• Native 1400 x 1050 (SXGA+) resolution. System accepts and displays images with a resolution of up to 1920 x 1200.
• Wide range of signal compatibility.
• Viewing area measures 59” x 44” x 73” diagonal.
• Designed for 24/7 operation. To ensure continuous operation, a maintenance kit is available for the projector that replaces all moving internal components within 8000 hours of system operation.
• 2000/3000-hour lamp life, 300-watt lamp, 2600 ANSI lumens weighs only 9 lbs. (4 kg.) and has a low noise level of only 28 dB(A).
• Power 100-240 VAC, 4A, 50/60 Hz.
• Lightweight 1” square aluminum frame system with locking hinge points for fast set up and take down.
• Includes long life mechanical elements, such as magnesium and ceramics, as well as over specified fans and color wheel engine.
• Fully sealed optical architecture ensures faultless operation in harsh environments.
• Cantilevered projector mounting arm preserves valuable floor space.
• Multiple projection screens can be connected together to form a single large screen.

Optional Components:
Cooling kit helps regulate projector temperature and prevent dust and debris from collecting on the projector in high temperature conditions (patent pending).

Packaging:
Screen and projector may be stored in two cases with wheels for easy transport.

| Packed Projector Case Case 1: | Dimensions: | in. | 24.5 W x 19.5 D x 15 H |
| Packed Screen and Frame Case Case 2: | Dimensions: | in. | 50 W x 17.5 D x 13 H |
| | Weight: | lb. | 74 |
| | | kg. | 33.6 |
**DC2E MEDIUM SCREEN DISPLAY, XGA**

The entry-level DC2E Medium Screen Display, XGA features a DLP projector that accepts and displays images with a resolution of up to 1280 x 1024. Despite its numerous capabilities, the Medium Screen Display system is compactly stored in two separate wheeled cases for easy transport.

Multiple screen systems can also connect together to form a dual screen (1009853) or triple screen (1009861) system.

**Features:**
- Native 1024 x 768 (XGA) resolution. System accepts and displays images with a resolution of up to 1280 x 1024.
- Wide range of signal compatibility.
- Viewing area measures 59” x 44” x 73” diagonal.
- 4000/6000-hour lamp life, 220-watt lamp, 2600 ANSI lumens weighs only 5.5 lbs. (2.5 kg.) and has a low noise level of only 32 dB(A).
- Power 100-240 VAC, 2.5A, 50/60Hz.
- Lightweight 1” square aluminum frame system with locking hinge points for fast set up and take down.
- Cantilevered projector mounting arm preserves valuable floor space.
- Multiple projection screens can be connected together to form a single large screen.
- Spare lamp included.

**Packaging:**
Screen and projector may be stored in two cases with wheels for easy transport.

DC2E LARGE SCREEN DISPLAY

Designed to fit into a large Deployable Rapid Assembly Shelter (DRASH), the DC2E J Series Large Screen Display features three DLP projectors that project three separate large, high resolution images. Its unique configuration allows it to be set up nearly 5 feet above the floor allowing for ease of viewing from the back of the TOC. Regardless of its size, the Large Screen Display system packs down tightly into three lightweight cases and does not require any tools for installation.

The DC2E J Series Large Screen Display is available as a Front Projection Screen Display system, offering three 90" diagonal viewing areas, or as a Rear Projection Screen Display system, offering three 76.7" diagonal viewing areas.

Features:
• Native resolution 1400 x 1050 (SXGA+). System accepts and displays images with a resolution of 640 x 480 to 1920 x 1200.
• Front Projection Screen measures 5.5' x 19' to allow for three separate 54" x 72" x 90" diagonal viewing areas; Rear Projection Screen measures 3.9' x 15.2' to allow for three separate 47" x 60.6" x 76.7" diagonal viewing areas.
• Three DLP projectors are designed for 24/7 operation. To ensure continuous operation, a maintenance kit is available for the projector that replaces all moving internal components within 8000 hours of system operation.
• 2000/3000 hour lamp life, 300-watt lamp, 2600 ANSI lumens weighs only 9 lbs. (4 kg.) and has a low noise level of 28 dB(A).
• Power 100-240 VAC, 12A, 50/60 Hz.
• Lightweight 1” square tube aluminum frame system with locking hinge points allows for fast set up and take down.
• Includes long life mechanical elements, such as magnesium and ceramics, as well as over specified fans and color wheel engine.
• Fully sealed optical architecture ensures faultless operation in harsh environments.
• Lightweight 2” tube frame supports all three projectors. Rugged, black, rubberized coating allows for increased durability. Slip fit joint system features quick securing clips.
• Three projector mounts with wide adjustability included for set up on uneven terrain.
• One 50Ft. and two 25Ft. HD15 VGA video cables included. One 30Ft. NEMA 5-15 extension cable and one 6 outlet power strip included.

Front Projection Screen Display

Rear Projection Screen Display

A DC2E Large Front Projection Screen Display.
DC2E LARGE FRONT/REAR SCREEN DISPLAY
1007655 / NSN’s Pending

Designed to fit into a J Series Deployable Rapid Assembly Shelter (DRASH), the DC2E Large Front/Rear Projection Screen Display system features three DLP projectors that project three separate large, high resolution viewing areas. Its unique design allows it to be set up in a front or rear projection configuration. The entire system including truss, screen, projectors and cables packs down tightly into four cases. All cases have large handles on all sides, purge valve and wheels on one end to increase transportability.

Features:
- Native 1400 x 1050 (SXGA+) resolution. Accepts resolutions from 640 x 480 through 1920 x 1200.
- Front projection configuration features three independent viewing areas of 54" x 72" x 90" diagonal.
- Rear projection configuration features three independent viewing areas of 45" x 60" x 75" diagonal.
- Images are greater than 48" above the floor allowing for ease of viewing from the back of the TOC.
- Three DLP projectors are designed for 24/7 operation. Includes long life mechanical elements, such as magnesium and ceramics as well over specified fans and color wheel engine.
- Fully sealed optical architecture ensures faultless operation in harsh environments. Depot level, 8000 hour maintenance kit replaces all moving parts.
- 2000/3000 hour lamp life, 300-watt lamp, 2600 ANSI lumens. Each projector weighs only 9 lbs and has a low noise level of only 28 dB(A).
- Power 100-240 VAC, 12A, 50/60 Hz.
- Lightweight 2” tube frame structure with rugged black coating supports projectors and screen. Includes adjustable feet for uneven terrain.
- Each of the three projector mounts allow for easy adjustments and stow attached to the projector.
- Setup time for either front or rear configuration is less than 30 minutes using four people. No tools required.

DRASH TACTICAL UTILITY FIELD FURNITURE (TUFF) TABLES

Features:
• Constructed from lightweight, rustproof, powder coated aluminum, TUFF Tables are durable and made for field use.
• Includes convenient storage space on the underside to hold cables, wires, mobile phone chargers, etc.*
• Folds for easy transport/storage.
• Supports 2,000 lbs (907 kg) of distributed weight.
• Cable management adapters available as an accessory.*
• Height from top of table measures 29.75”; leg-clearance height measures 28.”

MICROPHONE SYSTEM
1003688 / NSN’s Pending

Features:
• Includes Nine Delegate Stations, One Chairman Station and One Control Unit.
• Participants may easily follow and take part in a discussion through a table top station loudspeaker and a station microphone.
• The Chairman’s Station allows the operator to take over the conference session with a push of a button.
• Control unit can handle up to 25 stations per line equaling a total of 50 stations.

Packaging:
The Microphone System with supplied extension cables stow in two cases. Both cases have integrated wheels for easy transport.

| Small: BP300A005 | Dimensions: | in. | 24 x 72 | cm. | 61 x 183 |
|                 | Weight:     | lb. | 32      | kg. | 17       |

|                 | Weight:     | lb. | 38      | kg. | 14.5     |

* Features apply only to BP300A005
The DC2E’s Audio-Visual System comes in four different configurations: Mini, Small, Medium and Large (see next few pages). The following features are available for all configurations:

- Diskless components for increased reliability. Systems do not require additional software.
- Supports multiple displays and display types.
- POTS Line connects to standard analog phone line for audio conferencing.
- CTL LAN connects to LAN for WEB based control of the AV System.
- Display processor combines 4 or 8 real-time video and computer inputs in Windows onto one display. Windows can be scaled up to full screen. Capable of accepting and displaying images with a resolution of up to 1600 x 1200.
- Includes molded, weather-resistant transport cases for the control system and accessories.

MINI AUDIO-VISUAL SYSTEM
1005124 / NSN’s Pending

Features:
• Interface via touch panel or secure Internet connection.
• Video In: Four HD15 Computer Inputs that accept up to 1920 x 1200 resolution. Four BNC Inputs automatically detect HD/SD-SDI & Composite (PAL/NTSC) for DVD/SAT TV and/or Camera/UAV video.
• Audio In: Two Mic level XLR Inputs and two Line Level XLR Inputs for DVD/SAT TV audio.
• Video Out: One HD15 output supporting multiple user selectable output resolutions.
• Audio Out: Two Line Level XLR outputs, one dedicated to speaker.
• Includes one AC-powered speaker with integrated 20 Watt amplifier for audio distribution.

Packaging:
Mini AV Case
Molded, weather resistant, OD green case contains Control Processor, an Eight Window Video Processor and Audio Mixer.

Accessory Transport Case
Includes cables, touch panel and speaker.
