

## Mobile Vaccination System

(442 usable sq. ft.)  
1008295

The Reeves Mobile Vaccination System provides medical and public health personnel with **442 square feet of usable space** from which to administer seasonal vaccinations or vaccinations during a pandemic or other widespread outbreak.

Flexible and easily transportable, the Reeves Mobile Vaccination System features two shelter end caps that can be added or removed with minimal effort, allowing personnel to establish either a **walk-up vaccination clinic** with plentiful interior workspace or a **drive-thru clinic** from which personnel can deliver vaccines while still protected from the elements.

### Key Features Include:

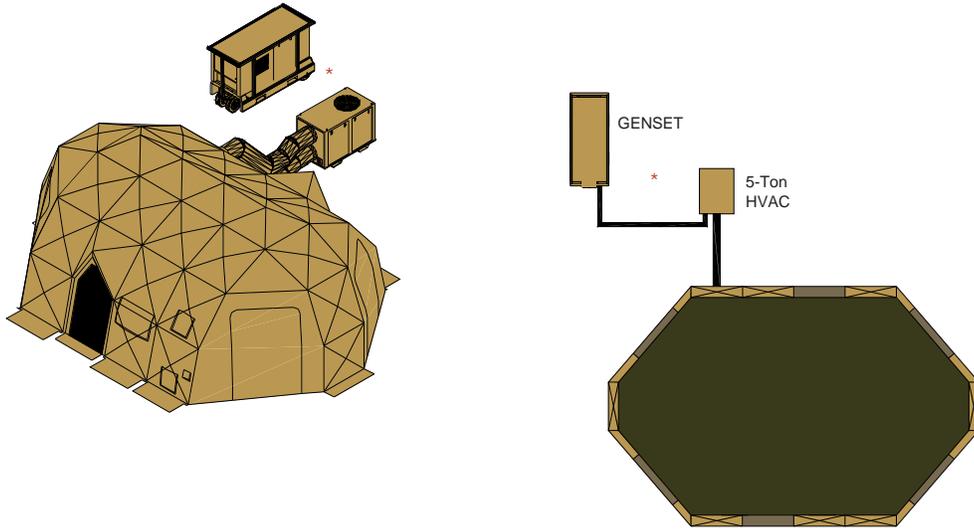

- Military-grade Deployable Rapid Assembly Shelter (DRASH) withstands extreme weather and temperature conditions.
- Shelter can be set up or taken down by minimal personnel within minutes, while a small bladder and blower system ensures no heavy lifting is required.
- "Turn key" system can be integrated with heating, cooling and power generation to form a complete infrastructure solution.
