

## 2-Lane Reeves First Response System

10'W x 16'L x 8.8'H

RDPK0008 (Blue)

The 2-Lane Reeves First Response Decontamination System is a rapidly deployable NBC decontamination facility crafted to effectively decontaminate both ambulatory and non-ambulatory patients from a remote location where water heating systems are not available.

Ideal for deploying in any setting with only two (2) to four (4) personnel and built to withstand winds, temperature and the elements, the 2-Lane System includes an open interior for rapid decontamination, curtains for patient modesty, a collapsible-wall berm for complete run-off containment, 2.5 gallon-per-minute showerheads and spray wands, and a self-heating, thermostatically-controlled multi-fuel water heater that provides up to 18 gallons per minute – all deployable in less than six (6) minutes!

### Reeves Decontamination Systems

Reeves First Response Decontamination Systems provide first responders with fully equipped NBC decontamination facilities in the event of an emergency incident.

The systems come fully equipped with a 165,000 or 425,000 BTU water heater and decon solution injection system and are built to be deployed anywhere, even in remote locations lacking a ready supply of hot water.

Additionally, the systems come with a full line of decon equipment, including an integrated plumbing package, berm, elevation grids, water pump, roller system and water supply adaptor kit. Multiple showerheads and spray wands supply the water flow necessary for thorough decontamination, and lane division curtains provide modesty between sexes.

# 2-Lane Reeves First Response System

## System Features

- Rapidly deployable system for effective NBC decontamination of male and female ambulatory and/or non-ambulatory patients
- No center poles or locking devices are needed to keep the shelter erect
- Shelter frame is manufactured from Titanite, an aerospace material with a flex strength 270% greater than that of aluminum
- Shelter will remain functional with up to 60% of the frame damaged or broken
- Durable, pre-attached cover is fire-retardant, mildew-resistant, water-repellent and highly abrasion- and UV-resistant
- Lane division curtain provides modesty between sexes
- 5-foot wide lanes provide ideal working space for responders and patients
- Shelter sits inside of collapsible-wall berm for complete run-off containment
- 2.5 gallon-per-minute showerheads and spray wands supply the water flow necessary for thorough patient decontamination
- Water heating and solution injection unit provides a high volume of heated decon solution and rinse water to the integrated showers, allowing for a safer and more comfortable patient decontamination process

## System Components

- 10'W x 16'L Single Exterior Cover Reeves "Responder" Shelter (includes push poles, stake set, repair kit and transport bag)
- 2-Line Integrated Plumbing Package - 8 Showerheads, 2 Black Spray Wands and 2 Red Spray Wands
- 2-Lane Curtain Package
- 13'W x 17'L x 8"H Collapsible-Wall Primary Containment Berm
- 2'W x 8'L x 3.5'H Patient Elevation Grids (10)
- 30 GPM Submersible Water Pump with 25-Foot, 1 1/2" Discharge Hose
- 165,000 BTU, up to 18 GPM Multi-Fuel Water Heater w/ Decon Solution Injection System (includes two (2) 35-foot, 1/2" water supply hoses - one (1) black and one (1) red)
- Water Supply Adapter Kit

## Standard Colors

Comes standard in Blue. OD Green, Red and Tan available upon request.

## Options

Waste Water Bladders  
50W Lights  
Roller System  
Diesel Generator  
Pre/Post Decon Kits  
Mesh Decon Litters  
Spine Boards

## Accessories/Replacement Parts

F329601 - XB Strut Blue
